Microservices, APIs and Innovation: The Power of APIs

Explore the role APIs play in empowering teams and enabling organizations to innovate.

Hypermedia : Definitions

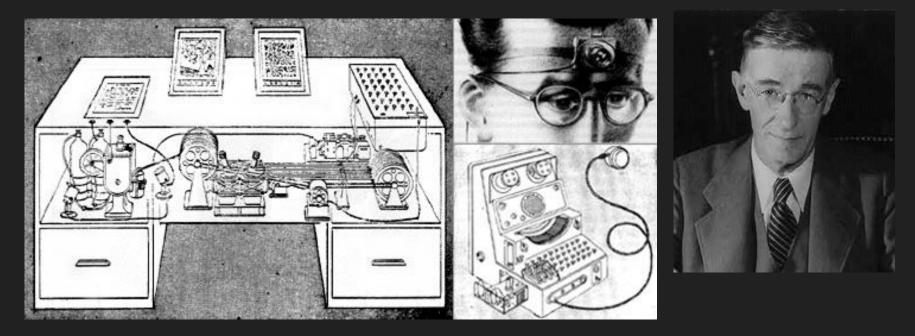

Ted Nelson's hyperlinks (1965)

The words hypertext, hyperlink, and hypermedia were coined by Ted Nelson around 1965.

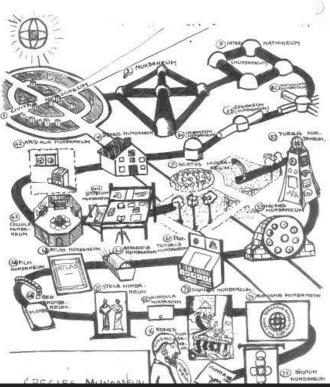

By Dgies - Own work, CC BY-SA 3.0, https://commons.wikimedia.org/w/index.php?curid=13691666

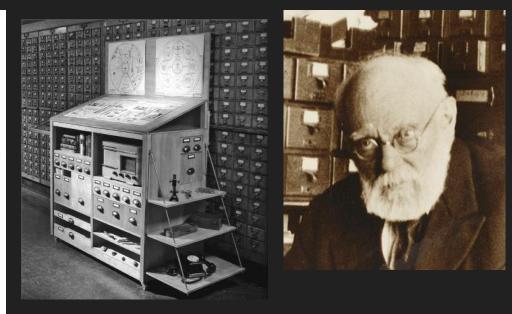

Vannevar Bush's Reader (1945)

Public Domain, https://commons.wikimedia.org/w/index.php?curid=1633052

Paul Otlet's World Wide Network (1934)

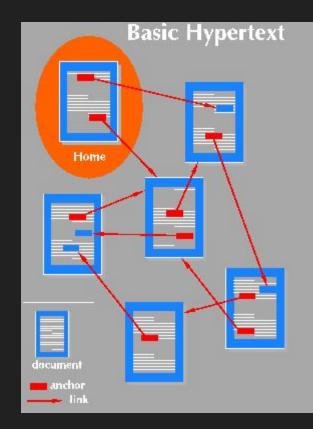

By Paul Otlet - Mundaneum, Public Domain, https://commons.wikimedia.org/w/index.php?curid=38324530

What is Hypermedia?

Hypertext is text which is not constrained to be linear.

https://www.w3.org/WhatIs.html

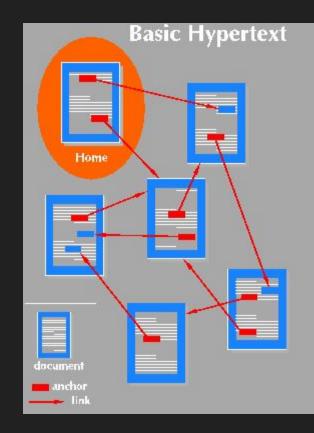

What is Hypermedia?

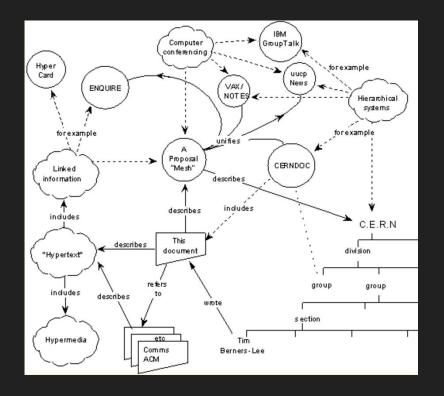

Hypertext is text which is not constrained to be linear.

Hypertext is text which contains <u>links</u> to other texts.

https://www.w3.org/WhatIs.html

Tim Berners-Lee WWW (1989)

By Paul Clarke - Own work, CC BY-SA 4.0, https://commons.wikimedia.org/w/index.php?curid=37435469

Hypermedia provides "extreme late binding" at runtime.

Hypermedia adds more information to the message

Hypermedia : affordances

Affordances

"The affordances of the environment are what it offers ... what it provides or furnishes, either for good or ill.

Ecological Approach to Visual Perception, Gibson, 1979

James Gibson

Affordances

"The term affordance refers to the perceived and actual properties of the thing, primarily those fundamental properties that determine just how the thing could possibly be used."

Donald Norman, 1988

Donald Norman

The Design of Everyday Things, Donald Norman 1988, 2013

Affordances

"When I say Hypertext, I mean the simultaneous presentation of information and controls such that the information becomes the affordance through which the user obtains choices and selects actions."

Roy Fielding, 2008

Roy Fielding Architectural Styles and the Design of Network-based Software Architectures, Fielding, 2001

Hypermedia affords dis-coordinated change over time

The more

you place in the message, the less you need in the code.

The more [info] you place in the message, the less you need in the code.

The more [meaning|info] you place in the message, the less you need in the code. The more [context|meaning|info] you place in the message, the less you need in the code.

The Best Software Architecture

"The best software architecture 'knows' what changes often and makes that easy." - Paul Clements
